

Powerful Cooling System

Dual Cooling Engines

Patented dual cooling engine design enables a non-stop working of 12 hours. Powerful cooling engine and sapphire touch cooling system minimize the burning risk on skin surface, while maintaining the heat within dermis where hair follicles are treated.

Premium Quality

2 Years Unlimited Shots Warranty

The premium quality laser generator, which is anti-condensation, dust-proof and waterproof, offers 2 years unlimited shots warranty. Reliable investment. No consumables.

Technical Specification

Laser Type	810nm 755nm+810nm+1064nm Combined
Laser Power	1800W
Optional Handles	Diode : 10*10mm Diode XL: 10*20mm Trio : 10*20mm Trio Lite : 10*20mm
Energy Density	5-50J/cm ²
Pulse Width	5-400ms
Frequency	1-10Hz
Cooling	<-5°C Dual cooling engines
Dimension	45*54*108cm
Net Weight	54kg

Coolite BOLT

High Power Diode Laser Platform

Address: Building A, JUNSD Hi-Tech Park, Watch & Clock Base, Guangming District, Shenzhen, China

V2024.4

Coolite BOLT

Coolite BOLT is a 1800W diode laser platform for hair removal and skin tightening, which equips with triple wavelength, large spot size and 4 optional handles. It is primarily known for its lightning-fast speed for pain-free depilation, also it recently introduces a new pioneering technique for skin tightening to improve the skin quality.

Intuitive HR Interface with Preset Parameters

Fast Mode is preset with clinically proved parameters for different body parts.

Free Mode is designed for professionals to choose accurate parameters for different patients.

Intuitive and user friendly interface make it easy to operate.

755nm 810nm 1064nm

Laser Hair Removal

Coolite BOLT releases triple wavelengths laser simultaneously to target different depths of hair follicles. The benefits of 3 wavelengths are utilized for optimum coverage and penetration to reach an ultimate result.

NEW

A lighter and compact Trio^{Lite} handle is newly added to the Coolite BOLT platform. The new handle is compatible to fit a magnetic facial tip for more convenient operation on small areas.

New Practise for Anti-aging BOLT Tightening

A new protocol for non-surgical skin tightening is developed for Coolite BOLT. The simultaneous emission of three wavelengths heats up the ligaments and stimulates the collagen to create immediate tightening results. In the meanwhile, the thermal effect accelerates the skin metabolism to tighten, brighten skin and shrink pores etc.

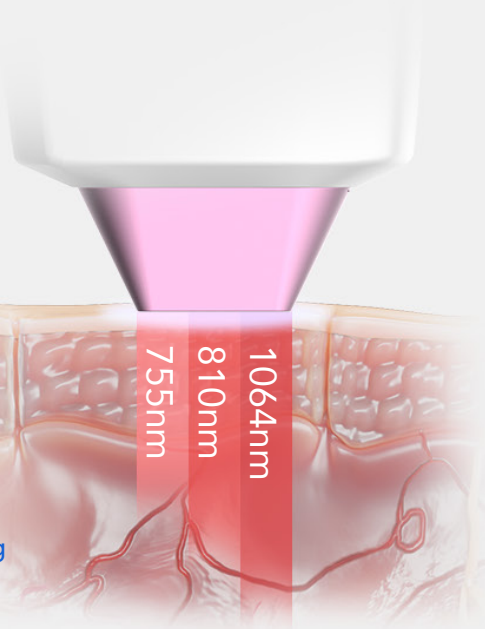

Skin Tightening

Skin Brightening

The Intelligent Solution for Hair Removal & BOLT Tightening

One Platform Meets all Needs

Lightning Fast Treatment 1800W High Power

With 1800W high power, Coolite BOLT delivers Ultra Short Pulse to heat hair follicles uniformly to an optimal temperature in a very short time without heating the epidermis. It provides maximum safety, comfort and efficiency without side effects.
